INTRODUCTION

INTRODUCTION

GENERAL COMMENTS

This publication is the fourth in an annual series and presents retail and service trade statistics on Alberta for the year 1975. Statistics presented in this publication deal with all known businesses within the scope of the annual survey. Approximately 18,000 businesses were surveyed to collect the data for the reference year 1975.

The mail survey, conducted immediately following the reference year, is based on all businesses provincially licensed to operate in Alberta and is augmented by a list of businesses operating in national parks. Respondents report on either a fiscal or calendar year basis and provide information on the number of male and female employees, payroll and total receipts from sales or services. The survey covers all retail and service operations with the following exceptions: retail trade excludes door-to-door selling as well as retailing taken on as a minor activity by manufacturers and wholesalers; service trade excludes professional services, institutions and establishments which provide a service to other businesses.

PUBLICATION CONTENT

Twenty-eight statistical tables are provided in this publication. Each table provides retail and service trade statistics at different geographic levels.

Table 1 - Principal Statistics - Retail and Service Trade by Type of Business, Alberta, 1975

Statistics in this table show the total number of outlets, male and female employees, payroll and receipts from sales or services in all Alberta. Data are arranged according to type of business activity (e.g., confectionery stores, grocery stores, delicatessens, etc.).

Tables 2-11 - Principal Statistics - Retail and Service Trade by Type of Business, Cities, Alberta, 1975

Statistics relating to the ten cities of Alberta are arranged according to type of business. The tables provide statistics on number of outlets, male and female employees, payroll and receipts from sales or services.

Table 12 - Principal Statistics - Retail and Service Trade by Business Group, Towns of Population 2,000 and Over, Alberta, 1975

Retail and service trade statistics by business group are presented and relate to forty-five towns in the province. Statistics for the various towns show the number of outlets, male and female employees, payroll and receipts from sales or services.

Table 13 - Retail and Service Trade - Outlets and Receipts, Selected Communities, Alberta, 1975

Number of outlets and total receipts are provided for retail and service trade activity in the majority of communities in Alberta. Communities omitted are those for which no data could be released because of the disclosure guidelines under which the Bureau operates. These guidelines guard against the release of data pertaining to individual establishments. In some instances it is only possible to show the combined total of retail and service trade receipts.

Tables 14-28 - Principal Statistics - Retail and Service Trade by Business Group, Municipalities Within Census Divisions, Alberta, 1975

These tables provide statistics on the number of outlets, male and female employees, payroll and receipts from sales or services by business group for all fifteen Census Divisions in Alberta. Statistics are also provided for the various Counties, Municipal Districts, Improvement Districts, Special Areas and selected major centres within the Census Divisions. In order to identify the geographic areas being referred to by these statistics a Census Division map for Alberta precedes the table.

DEFINITONS

The following definitions apply uniformly throughout this publication:

Principal Statistics - Consist of: number of outlets, male and female employees, payroll and receipts.

Total Trade - The combined total of retail plus service trade.

Receipts - Includes all (gross) receipts from sales and/or services. Tables are based on figures reported on either a fiscal or calendar-year basis.

Payroll - Includes: salaries and wages, commissions, bonuses, payments for leaves or holidays and payments in kind. Excludes proprietor's withdrawals or salaries and salaries and wages of employees involved in contract or cartage work. Tables are based on figures reported on either a fiscal or calendar-year basis.

Employees - Includes male and female employees on staff at the last pay period of February, 1975 only. Full and part-time employees are reported and working owners are not included unless the business is incorporated.

NOTE: As employees and total payroll are not based on the same reference period, the calculation "average salary per employee" will not produce a valid relationship.

Retail Outlet - A business engaged primarily in selling merchandise to final users.

Service Outlet - A business engaged primarily in providing a service to the public for a fee.

Business Group - A broad category under which all related business establishments are grouped (e.g. - FOOD or GENERAL MERCHANDISE).

Type of Business - The finest breakdown of a business group possible (e.g. - Confectionery Stores or Department Stores).

CHANGES IN 1975

Geographic boundary changes to some census divisions and the renumbering of some municipalities took place in 1975. The statistics in this publication are based on the new boundaries and municipality numbers as shown on the map (page 71). A table showing the conversion between 1972 and 1975 municipality numbers is included as Appendix C.

PUBLICATION CRITERIA

Statistics presented in this publication conform to confidentiality guidelines of The Statistics Bureau Act, 1958, which prevents disclosure of information pertaining to individual establishments. An asterisk in place of any statistic indicates that disclosure is not possible. To prevent residual disclosure of a confidential statistic, it has been necessary to suppress other statistics.

Disclosure of the number of establishments belonging to any particular type of business is not governed by the Act and therefore these statistics are presented in all tables.

ACKNOWLEDGEMENTS

Appreciation is extended to the many establishments which regularly provide the data necessary for the preparation of this publication.

HIGHLIGHTS

The purpose of this section is to summarize the statistics presented in this publication and to show the relative importance of retail and service trade to the Alberta economy.

The following tables present:

TABLE I - Statistics comparing the number of persons employed in the retail and service trade sector to that of the total employed labour force in Alberta.

TABLE II - The total value of 1975 retail and service trade in Albertan cities with their respective changes over 1974 values.

TABLE III - Total value of retail and service trade by business group with their respective market shares for 1974 and 1975 and also the percent changes of 1975 figures compared with 1974.

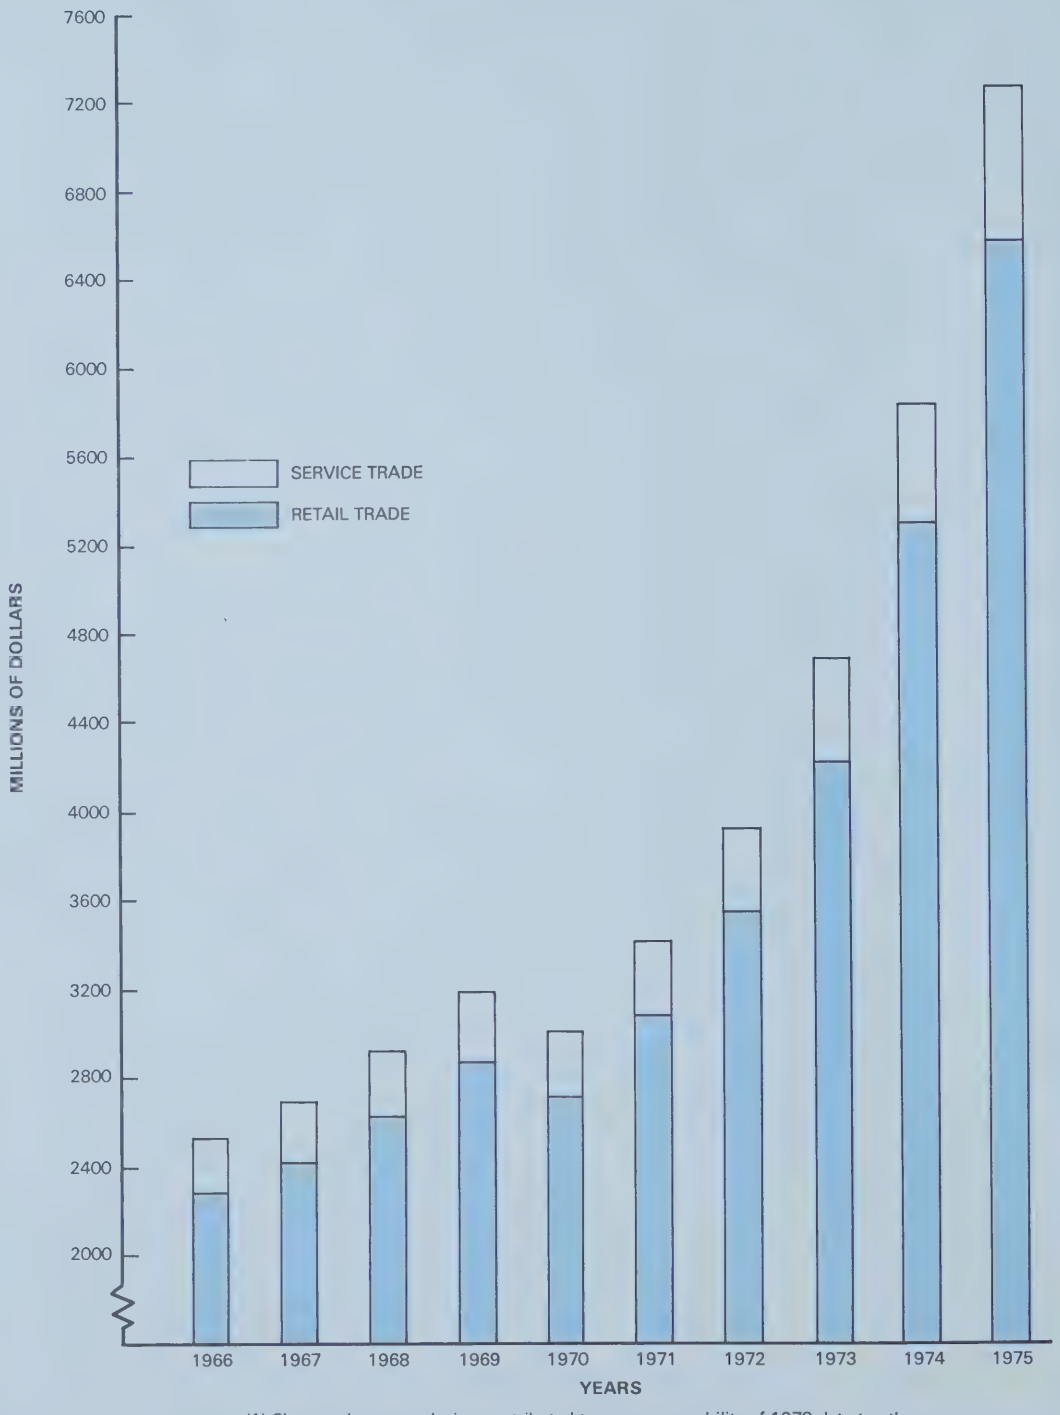
1975	4,774	13,892	24,486	182,281	686,240
TOTAL TRADE					
1966	17,729	49,326	39,089	283,118	2,525,433
1967	17,108	48,794	37,827	309,830	2,680,300
1968	17,248	51,475	41,716	357,924	2,917,932
1969	17,005	53,056	43,292	384,234	3,183,336
1970(2)	15,807	48,843	40,934	393,191	3,029,218
1971	16,262	50,935	43,031	441,716	3,414,703
1972	16,461	55,645	45,933	560,038	3,910,746
1973	16,976	59,973	56,853	580,784	4,656,302
1974	17,442	66,388	63,397	731,412	5,816,427
1975	18,052	72,094	66,090	938,481	7,251,646

NOTE: (1) The 1965 - 1969 statistics are presented on the basis of number of firms while data for 1970 and subsequent years are presented on a number of outlets basis. In 1970, the Bureau of Statistics required that multi-establishment companies report their total number of outlets in each geographic location. Previously these companies reported as a singular unit.

(2) The 1970 statistics are not totally comparable to those for previous and subsequent years. Improvement in administrative procedures at the provincial licensing authority, from which the base list of outlets is obtained, and the implementation of modified survey procedures by the Bureau of Statistics combined to affect the comparability of the 1970 statistics.

GRAPH 3
RETAIL, SERVICE AND TOTAL TRADE,[1] ALBERTA, 1966-1975



(1) Changes in survey design contributed to non-comparability of 1970 data to other years.
